

The following information regarding recent German and Italian activities in the Basque Country has been received by the Basque Government from reliable sources.

### Concentration of Troops

The bicycle factory of LOINAZ, at ALZA, near PASAJES (GUIPUZCOA) has been converted into a barracks for a military engineer unit.

On the 9th instant, the warehouses of the port of PASAJES were fitted up as barracks, in which engineers who were lately at SAN SEBASTIAN have been quartered.

These soldiers belong to the 1927 recruiting class and their transfer seems to be a part of a wider plan of concentration, according to which further troop concentrations have taken place at several points near the Pyrenees.
